

IZAR@NET

Reading management software

IZAR@NET is a PC software for reading and operating all types of meters (water, energy, electricity, gas and others) through the use of a database. It is compatible with all the reading methods of IZAR products: manual reading, reading with a handheld radio terminal and remote reading (i.e. using GPRS, M-Bus and other networks). IZAR@NET is a tool adapted to the management of data and alarms, the analysis of water networks and other industrial applications.

Easy access to the data in the form of tables and graphic displays (curves, histograms, interpolation, etc.) means you can monitor consumption, alarms and other data.

Different options are available, such as map viewing, SMS or e-mail notification, reports issued when alarms occur in the installation and transferring of your data in various formats. The simplified IZAR Converter version without a database can also be used for interfacing with an invoicing application.

TECHNICAL CHARACTERISTICS

Architecture	Client/Server
Database	Oracle Personal Edition
Operating system	Windows

AVAILABLE VERSIONS

IZAR@NET 60	Up to 60 meters
IZAR@NET 1000	Up to 1,000 meters
IZAR@NET unlimited	Unlimited number of meters

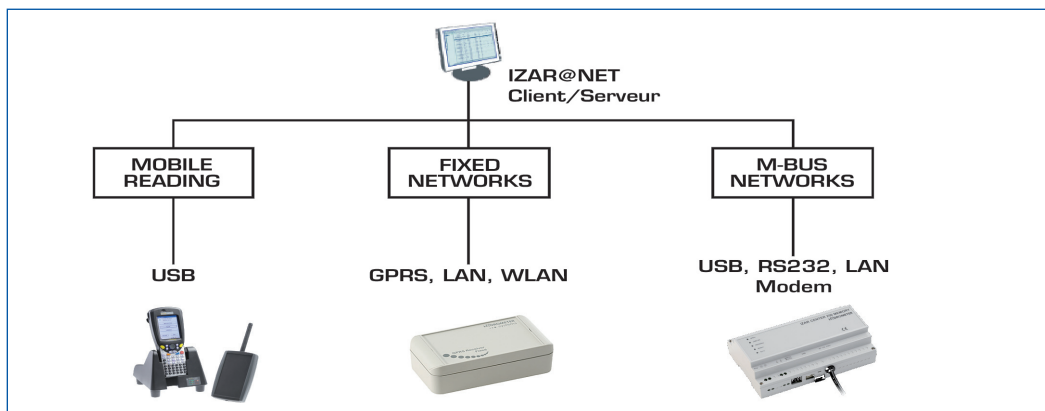

BASIC MODULES

Mobile reading	Reading with a handheld PSION WorkAbout PRO computer
Fixed network	Remote reading of installations by GPRS/LAN/WLAN via FTP server
M-Bus Network	Direct and remote reading of M-Bus installations (IZAR CENTER M-Bus unit)

ADDITIONAL MODULES

Graphics and analyses	Illustration in graphic form; Possibility of representing several curves on a single graph; Different graphic windows displayed simultaneously.
Alarms	Automatic notification of alarms on screen or by e-mail/SMS messages
Maps	Map viewing of meter data (consumption, alarms etc.) using Google Earth.
Import/Export	Interfacing for the import and export of meter data (ASCII, Excel, ODBC connection)

PRINCIPLE

MINIMUM CONFIGURATION

- PC running Windows (Windows 2003 server, Windows XP SP2, Windows Vista)
- 2GHz processor minimum
- 512 MB main memory (1,024 MB recommended)
- 4 GB available disk space
- NTFS file system
- Monitor with 1024 x 768 resolution
- 2 available USB connectors
- CD-ROM drive
- TCP/IP network connection

NOTES

The Oracle Personal Edition database (included in the software) is limited to 4GB of data. 4GB of data corresponds to 100,000 meters read monthly for 10 years. To extend these limits, a superior version of the database is available. In this case, we recommend using Oracle Standard Edition One.
